Adopting BIAN is more than a reference architecture exercise — it requires deep expertise in how the standard translates into real-world banking architecture, API design, data alignment, and governance.

As a BIAN-accredited organisation and two-time award winner of BIAN's Best In Class Partner Award (2024 and 2025), CC&C's consulting services brings the required expertise directly into your organisation.

Our consultants work alongside your architecture, technology, and delivery teams to apply BIAN correctly across the full spectrum of adoption activities. This includes establishing a BIAN-aligned reference blueprint, mapping your application landscape to BIAN Service Domains, designing BIAN-conformant APIs, aligning your data model to the BIAN Business Object Model (BOM), and standing up governance frameworks that ensure long-term compliance and value.

Whether you're at the start of your BIAN journey or looking to accelerate an existing programme, CC&C provides the hands-on expertise to move from strategy to execution. We've supported banks and financial institutions across Australia, New Zealand, Asia-Pacific, the UK, Europe, Africa, and North America — bringing global experience with local delivery.
