Not sure where BIAN fits in your organisation, or how to make the case for adoption? CC&C's BIAN Discovery Workshop is a focused engagement designed to help financial institutions identify their highest-value BIAN use cases and build a compelling, evidence-based business case for adoption.

Led by CC&C's experienced BIAN consultants, the workshop brings together your key stakeholders — from architecture and technology to business and product — for a structured series of working sessions. Together, we explore your strategic objectives, pain points, current-state architecture, and priority areas of opportunity.

The workshop delivers a tailored BIAN scope assessment, a prioritised use case shortlist aligned to your strategy, and the foundations of a business case that links BIAN adoption to measurable outcomes — whether that's reducing duplication, accelerating delivery, improving data quality, or enabling AI at scale.

As a BIAN-accredited consulting and training organisation with deep banking domain expertise, CC&C brings real-world implementation experience to every engagement — not just theory.
